(6) Registration type

R : Referencement

The work is put into a "virtual" logibox, that means that at the moment of the on line referencing an IDDN certificate is attributed to the work. On the other hand the work as it has been signed must be kept by the rightholder. You just need to become an IDDN member in order to reference your works on line.

Warning : this procedure doesn't allow contractual access to the source code.

For the following types of registration (physical deposit), please contact the APP :

D : Distribution deposit

Two copies of the work, as distributed to the public, are placed in two logibox, one kept by the APP, the other given to the right owner.

This kind of deposit applies notably to data bases, users documentation, non-textual data files or executable programs.

Warning : this procedure doesn't allow contractual access to the source code.

The distribution deposit is not a substitute to the statutory deposit which remains compulsory for some works.

S : Source code deposit

Two copies of the work, under its confidential release, are placed in two logibox, one kept by the APP, the other given to the right owner. It may apply to the source program which can be accompanied by either the preparatory design material, the system analysis, or other documents.

This kind of deposit allows access to the source code, on explicit authorisation contained in a written document.

Mozambique = MZ

Myanmar = MM

Namibia = NA

Nauru = NR

Nepal = NP

C : Controlled deposit

It's a particular mode of the source code deposit, within which the contents deposited have been audited by a third person.

X : Unspecified

This type of registration responds to any "dating and evidence preservation" request, containing no claim for copyright. This request may be for instance addressed by a third person.

(7) Type of work

P : Primary work

Creation using no component (concrete or abstract) of a pre-existing work.

C : Composed work

Creation incorporating, under their published form, the whole or an identifiable part of pre-existing works.

A : Derivative work

Creation based on a pre-existing work and containing no identifiable component.

X : Unspecified

Creation which could not be classified or currently under examination.

(8) Year of first registration

(9) Key

Specifies the key calculation software (compression) applied to the file containing the work in order to get the electronic signature.
